| PRODUCT CHARACTERISTICS           |                     |
|-----------------------------------|---------------------|
| Origin                            | Pakistan/India      |
| Product denomination (legal name) | Himalayan Pink Salt |
| Description of the product        | Himalayan Pink Salt |
| Ingredients                       | Natural Rock Salt   |

| Organoleptic values |                                                    | Method       |
|---------------------|----------------------------------------------------|--------------|
| Appearance          | Crystalline Pink                                   | Organoleptic |
| Colour              | Pink                                               | Organoleptic |
| Flavour             | Characteristic of Salt, no off flavours or taints. | Organoleptic |
| Odour               | No off odours or taints                            | Organoleptic |
| Texture             | Fine                                               |              |

| Analytical values          | Target | Minimum               | Maximum       | Method        |
|----------------------------|--------|-----------------------|---------------|---------------|
| Moisture (% w/w)           |        |                       | 0.5%          | ISO 1442:1997 |
| Volatile Oil (% v/w)       |        |                       |               | ASTA 5.0      |
| Acid insoluble ash (% w/w) |        |                       |               | ASTA 4.0      |
| Ash content (% w/w)        |        |                       |               | ISO 936:1998  |
| Mycotoxins :               |        |                       |               |               |
| Aflatoxin B1               |        |                       | <5ppb         | ASTA 24.1     |
| Aflatoxin total            |        |                       | <10ppb        | ASTA 24.1     |
| Assay(Dry Basis)           |        | 99.5% minimum as NaCl |               |               |
| Insoluble                  |        |                       | 0.25% maximum |               |
| Moisture                   |        |                       | 0.5% maximum  |               |

|                         |                           |
|-------------------------|---------------------------|
| Spec Issue No : 1841    | Version : 08              |

| How do you control cross contamination of allergens processed on site? |                                                                                                                                      |                    | <p>we implement strict allergen control measures to prevent cross-contamination of allergens such as <b>Mustard, Celery, Cereals containing Gluten and sulphites and Sesame</b>. This includes segregated storage, dedicated equipment when feasible, validated cleaning protocols, and regular allergen swab testing. Our staff are trained in allergen handling, and we use controlled production scheduling to minimize risks. We also ensure suppliers follow strict allergen management procedures. While environmental factors in the supply chain can introduce risks, we are committed to maintaining the highest standards of allergen safety.</p> |                   |                                                  |

| If the goods or any part thereof supplied under the contract are processed, altered or tampered with in any way by the buyer or receive of the goods or any other person, the quality of the goods shall be deemed to be acceptable to the buyer. All customers' quality control checks are to be completed on the entire load, prior to production and use.                                                                                                                                                              |
| <b>Infestation</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Relating particularly to Coriander Seed, Whole Chillies and Fennel Seed: We cannot guarantee that goods will not at a later date, be subjected to infestation, unless specifically vacuum treated or heat treated. Even after treatments, treated goods can be subjected to re-infestation if incorrectly stored. Untreated seeds, herbs and spices in any form, treated with approved chemical fumigants, are still susceptible to possible infestation, as insect eggs are not destroyed by current chemical fumigants. |

| Nut & Peanut Statement                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
