BRIEF DESCRIPTION	Acai Berry is a small, purple berry of the Acai palm which grows normally in the flood lands and swampy areas of the Brazilian Amazon region. Harvested twice a year, these black glittering berries are a treasure of nutrients embodying a wealth of minerals. The Acai berry seed takes about 80% of the total fruit and the seed can be used in certain animal feeds after grinding. Two predominant species of acai exist: Euterpe Oleracea and Euterpe Precatoria. Most of the acai readily available on the market is produced from oleracea variety. Our acai belongs to a more unique botanical variety - Euterpe Precatoria which is high in antioxidants.
